has successfully completed the online Specialization

AI for Healthcare Systems

AI for Healthcare Systems is a comprehensive exploration of AI-relevant tools, applications, and systems for mid-career healthcare professionals and others interested in this topic. This specialization benefits learners who are beginning to explore a career in AI for healthcare or seeking to gain more knowledge. Systematically using analytics, reporting tools, and data visualization techniques helps healthcare organizations gain comprehensive insights that support better decision-making and performance optimization. In turn, AI enhances the capabilities of healthcare professionals and systems, contributing to a more effective, efficient, and patient-centered healthcare system.

Jiban Khuntia

Jiban Khuntia, Ph.D.
Associate Professor of Information Systems
Director of Health Administration Research Consortium

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
